## **Detailed Action**

### ***Reasons for Allowance***

1. Claims 1,2,4,6, and 8 (renumbered as 1-5) are allowed.
2. The following is an examiner's statement of reasons for allowance. The prior art does not teach nor reasonably suggest, as recited in claims 1,4,6, and 8 a guide unit includes an end portion selectively assuming two operation positions including a contact position in which said end portion is brought into contact with said chassis and a non-contact position in which said end portion is brought out of contact from said chassis.

The closest prior art is Tatsuhiko (JP 2002-109810) shows a guide unit being supported by said base member to be pivotable around said axis and pivotable independently from said chassis pivoting with respect to said base member to be held in engagement with said chassis, but does not show an end portion selectively assuming two operation positions including a contact position in which said end portion is brought into contact with said chassis and a non-contact position in which said end portion is brought out of contact from said chassis.

3. These features, in combination with the other features of Claims 1,4,6, and 8 are not anticipated by, nor made obvious over, the prior art of record.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
